

HTML Validation

Index.html

Document checking completed. No errors or warnings to show.

Game.html

1. **Warning** Possible misuse of `aria-label`. (If you disagree with this warning, [file an issue report](#) or send e-mail to www-validator@w3.org.)

[From line 67, column 11; to line 68, column 102](#)

```
<canvas id="gamecanvas" class="col-12" ..... aria-label="Game area with space image, space rocket icon for correct questions answered">.....
```

Per <https://pauljadam.com/demos/canvas.html>, using ARIA role=img and aria-label="alt text" on the <canvas> element or the internal fallback content creates an element available to the screen reader. I added role=img to the canvas element and re-ran through validator. Warning cleared

Document checking completed. No errors or warnings to show.

Learn-more.html

Document checking completed. No errors or warnings to show.

404.html

Document checking completed. No errors or warnings to show.

CSS Validation

W3C CSS Validator results for TextArea (CSS level 3 + SVG)

Congratulations! No Error Found.

This document validates as [CSS level 3 + SVG](#) !

JAVASCRIPT Validation

Email.js

One undefined variable

7 emailjs

Three unused variables

4 contactForm

6 sendMail

35 ValidateEmail

Used code per emailjs. Tested if could declare variable within file but this caused issues. Variables are used in the script in the learn-more page, to send email

Questions.js

No issues

CONFIGURE

Script.js
